In times past, societal roles and beliefs usually defined a woman's connection with plants. Through private networks, determination and persistence, many created new roles as travellers, collectors, artists, and scientists. We will travel through British India, the Amazon, Queensland's Brigalow Belt, the orchid fields of Victoria, and closer to home - our Botanic Gardens.

Mount Coot-tha Botanic Gardens, Friday 11:00am - 12:00pm. One week only. One-off guided walk. Class date 7 March.

X25 ARCHITECTURE AND URBAN DESIGN Face-to-face class

Tutor: Jennifer Bopp

What is architecture and what is urban design, and what do they have in common? The answer is design and the built environment. In urban areas the built environment surrounds us, but what is known about its form, and could it be understood and improved by applying urban design principles to existing places, and to proposed new development areas? In this course many concepts will be discussed with illustrated presentations to offer insights into the built environment and the historic, cultural, technological and aesthetic ideas that influence its form, including styles of architecture, the influence of climate, and sustainability.
